

Risk register — the template

The register that gets read in committee, not in appendix: few lines, named owners, dated mitigations.

RISK	IMPACT (1-4)	LIKELIHOOD (1-4)	CRITICALITY (I×L)	OWNER	MITIGATION	DUE DATE	STATUS

Criticality ≥ 9: handled at steering level, not in the team

- One NAMED owner per risk — a risk owned “by everyone” is owned by no one.
- A DATED mitigation, reviewed at every committee — otherwise it is an observation, not a mitigation.
- Beyond fifteen lines nothing is a risk any more: merge or downgrade.
- The register lives in committee — a register kept in appendix is already dead.
